

**The Biocodex Microbiota Institute** is an international hub of knowledge dedicated to microbiota. The Institute educates the lay public and healthcare professionals on the importance of microbiota on healthcare and well-being.

**The Biocodex Microbiota Foundation** promotes scientific discovery in microbiota by funding academic research and rewarding innovative projects which are likely to improve public health.

**BIOCODEX**  
MICROBIOTA  
FOUNDATION

- 1 international grant each year
- 10+ national grants each year
- 3 Henri Boulard awards each year

**OUR GRANT**

# INTERNATIONAL

Since 2017, the Biocodex Microbiota Foundation rewards international research projects focused on human gut microbiota related to health and disease. Every year, the call for projects covers a specific theme chosen by a committee of independent international scientists.

**SINCE 2017**

The annual call for proposals is carried out in countries where Biocodex has a subsidiary presence. An independent local scientific committee – made up of scientists recognized for their expertise in the microbiota field – gathers all proposals and selects the winning project to be granted.

**OUR GRANT**

# NATIONAL

**HENRI BOULARD AWARD**

To foster its commitment to improving health worldwide, the Biocodex Microbiota Foundation has launched in 2021 the Henri Boulard Award, a grant that rewards innovative projects which are likely to provide an improvement to public health in pathological conditions linked to the human intestinal microbiota imbalance. Every year, the best 3 projects will each be awarded €10,000.

**SINCE 2021**
